## SUMMARY:

I am highly engaged in my profession with my 6 years of experience working in the IT industry. I always want to be better, therefore, I committed myself next to the self-improvement. My experiences stand for manual and automation testing, proven work experience in an agile environment, programming skills, wide-spread technical and business knowledge. I have multiple ISTQB advanced certificate and my next step going to be the ISTQB - Advanced Level Test Manager certificate.

## IT SKILLS:

<u>Test Automation</u>	<u>Technical</u>	<u>General</u>	<u>Developer</u>
Advanced level ISTQB certified	Jenkins, CI	Agile development (Scrum)	Java, Python, TestNG
BDD (Cucumber)	SQL	Jira, Scrum Mate	HTML, CSS, JavaScript, jQuery
Selenium Webdriver	XML and JSON	SDLC	Version control, Git

## WORK EXPERIENCE:

- 12/2019 – Present      **Axa Ireland, QA Test Analyst (Contractor), Dublin, Ireland**
  - Test Analyst (50%) in one of the agile team. Take care of the quality of the project and the process
  - Test Automation Engineer (50%) role in the Test Automation team. Maintain and expand automation tests and framework. Run automated tests against different environments during sprints and before releases
  - **Technical Stack:** Scrum, C#, Selenium WebDriver, Azure Cloud, Oracle SQL, Microsoft SQL Server,
- 05/2019 – 11/2019      **OpenJaw Technologies, QA Automation Engineer, Dublin, Ireland**
  - As a QA I worked with two Developer teams and collaborated with other teams (DevOps team, Architect team)
  - As Test automation engineer I created new Test Automation frameworks and Test Automation Analysis documents
  - Manager responsibilities: I Interviewed the new QA candidates and created report from the QA side in every week about the actual process. I introduce the ongoing QA tasks and give update during the weekly team meetings
  - **Technical Stack:** Scrum, Java, Maven, Selenium WebDriver, TestNG, Gauge, Oracle SQL, Jira, Putty
- 10/2017 – 03/2019      **MetLife, Test Consultant (Contractor), Dublin, Ireland**
  - Design manual test cases in BDD format and execute them
  - Find bugs in the software and report it in Jira
  - Create GUI Test automation pilot from scratch
  - **Technical Stack:** Kanban, Java, Maven, Selenium WebDriver, TestNG, Cucumber, Jira, Kanban
- 05/2016 – 08/2017      **IP Systems Ltd., QA Test Engineer, Budapest, Hungary**
  - Functional testing web based software, communication with the costumers and the Product Owner
  - Ensure the quality of the actual project with tests and advice
  - Prepare test environments for testing and releases. Managing and supervising the release processes
  - **Technical Stack:** Scrum, Java, Selenium WebDriver, TestNG, Oracle SQL, Jenkins, Putty, XML, JSON, API
- 05/2014 – 05/2016      **Aegon Hungary, Junior Tester & IT Business Analyst, Budapest, Hungary**
  - Writing functional specifications, user guides and supervising the daily and monthly closures
  - Manual testing the business processes in the CRM insurance portfolio systems. Support the actual systems and projects. Handling the incoming error tickets from the customers (prioritize, management)
  - **Technical Stack:** Waterfall, Oracle SQL
